## Index

- Adjoint
  - of the linear operator, 13
  - of the gradient, 57
- Advection equation, 64
- Bar, 1
  - equation of equilibrium of, 3
  - Green's function of, 11, 13
- Beam, 18
  - Green's function of, 21
- Bending moment, 18
- Bessel's inequality, 107
- Boundary conditions,
  - Dirichlet, 25
  - Neumann, 25
  - self-adjoint, 20
- Burgers' equation, 23
  - inviscid, 74
  - quasilinear, 41
- Characteristics, 64
- Characteristic curve, 70, 73
- Characteristic variables, 64
- Cauchy-Schwarz inequality, 79
- Cole-Hopf transformation, 41
- Complex Fourier series, 96
- Complex vector space, 84
- Conservation law, 72
- Conservation of energy law, 24
- Constitutive relation, 2
- Convergence
  - in the norm, 83
  - pointwise of a Fourier series, 99
  - uniform, 101
  - uniform of a Fourier series, 101
  - weak, 99
- Convolution, 115
- Delta function, 5
  - derivative of, 9
  - Fourier series of, 97
  - Fourier transform of, 112
- Diffusion,
  - equation, 23
- d'Alembert's formula, 66
- Dirichlet
  - boundary condition, 25
  - integral, 59
- Displacement, 1
- Eigenfunction, 27
- Eigenvalue, 27
- Error function, 41
  - complimentary, 44
- Euler equation, 50
  - characteristic equation of, 50
- Euler-Lagrange equation, 17

- Flux function, 72
- Fourier coefficients, 88
- Complex Fourier coefficients, 96
- Fourier series, 87
  - differentiation of, 94
  - integration of, 92
  - pointwise convergence of, 99
- Fourier's Law of Cooling, 24
- Fourier integral, 110
- Fourier transform, 110
  - derivative of, 113
- Function
  - analytic, 89
  - average of, 92,
  - generalized, 6, 97,
  - periodic extension of, 89
  - piecewise continuous, 89
  - square-integrable, 105
  
- Generalized function, 6
- Green's formula, 57
- Green's function, 5, 10
  
- Harmonic function, 54
- Heat capacity, 23
- Heat equation, 25
  - smoothing property of, 29
  - uniqueness of solutions, 33
  - fundamental solution, 36, 37
  - inhomogeneous, 37
  - periodic boundary conditions of, 32
  - in polar coordinates, 49
- Heat flux, 24
- Hermitian inner product, 84, 96
- Hölder inequality, 82
- Hook's Law, 2
- Homogenization transformation, 30
  
- Inner product, 77
  - Euclidean, 77
  - Hermitian  $L^2$ , 85
  - sesquilinear, 85
  - weighted, 78
- Inner product vector space, 77
  - complex, 84
  
- Jump discontinuity, 8, 89
  
- Laplace equation, 45
  - in polar coordinates, 49
- $L^2$ -inner product, 14
  
- Method of images, 39
- Minimum Principle, 13
  
- Neumann
  - boundary condition, 25
  - homogeneous boundary conditions, 26
- Norm, 78, 78
  - 1-norm, 81
  - p-norm, 82
  - $\infty$ -norm, 82
  - $L^p$ -norm, 82
  - $L^\infty$ -norm, 82
- Operator
  - self-adjoint, 15
  - positive definite, 15
  - eigenvalue problem of, 27
  
- Phase plane, 67
- Plancherel formula, 108
- Pointwise convergence, 101
- Poisson equation, 45, 52
  - Greens's function of, 56
  - the minimization principle for, 59

Radial Gauss distributions, 53  
Ramp function, 13  
Rarefaction wave, 74  
Riemann's Lemma, 100

Separation of variables, 26  
Statically determinate configuration, 4  
Statically indeterminate configuration, 4  
Step function, 7  
    derivative of, 8  
Stiffness, 2  
Strain, 1  
    bending, 19  
Strain energy, 17  
Stress, 1  
Superposition integral, 34  
Superposition principle, 5

Thermal conductivity, 5, 24  
Transport equation, 64  
Travelling waves, 64  
Triangle inequality, 78

Uniform convergence, 101

Wave equation, 61  
Weierstrass test, 102
